

GGC Bachelor of Information Technology

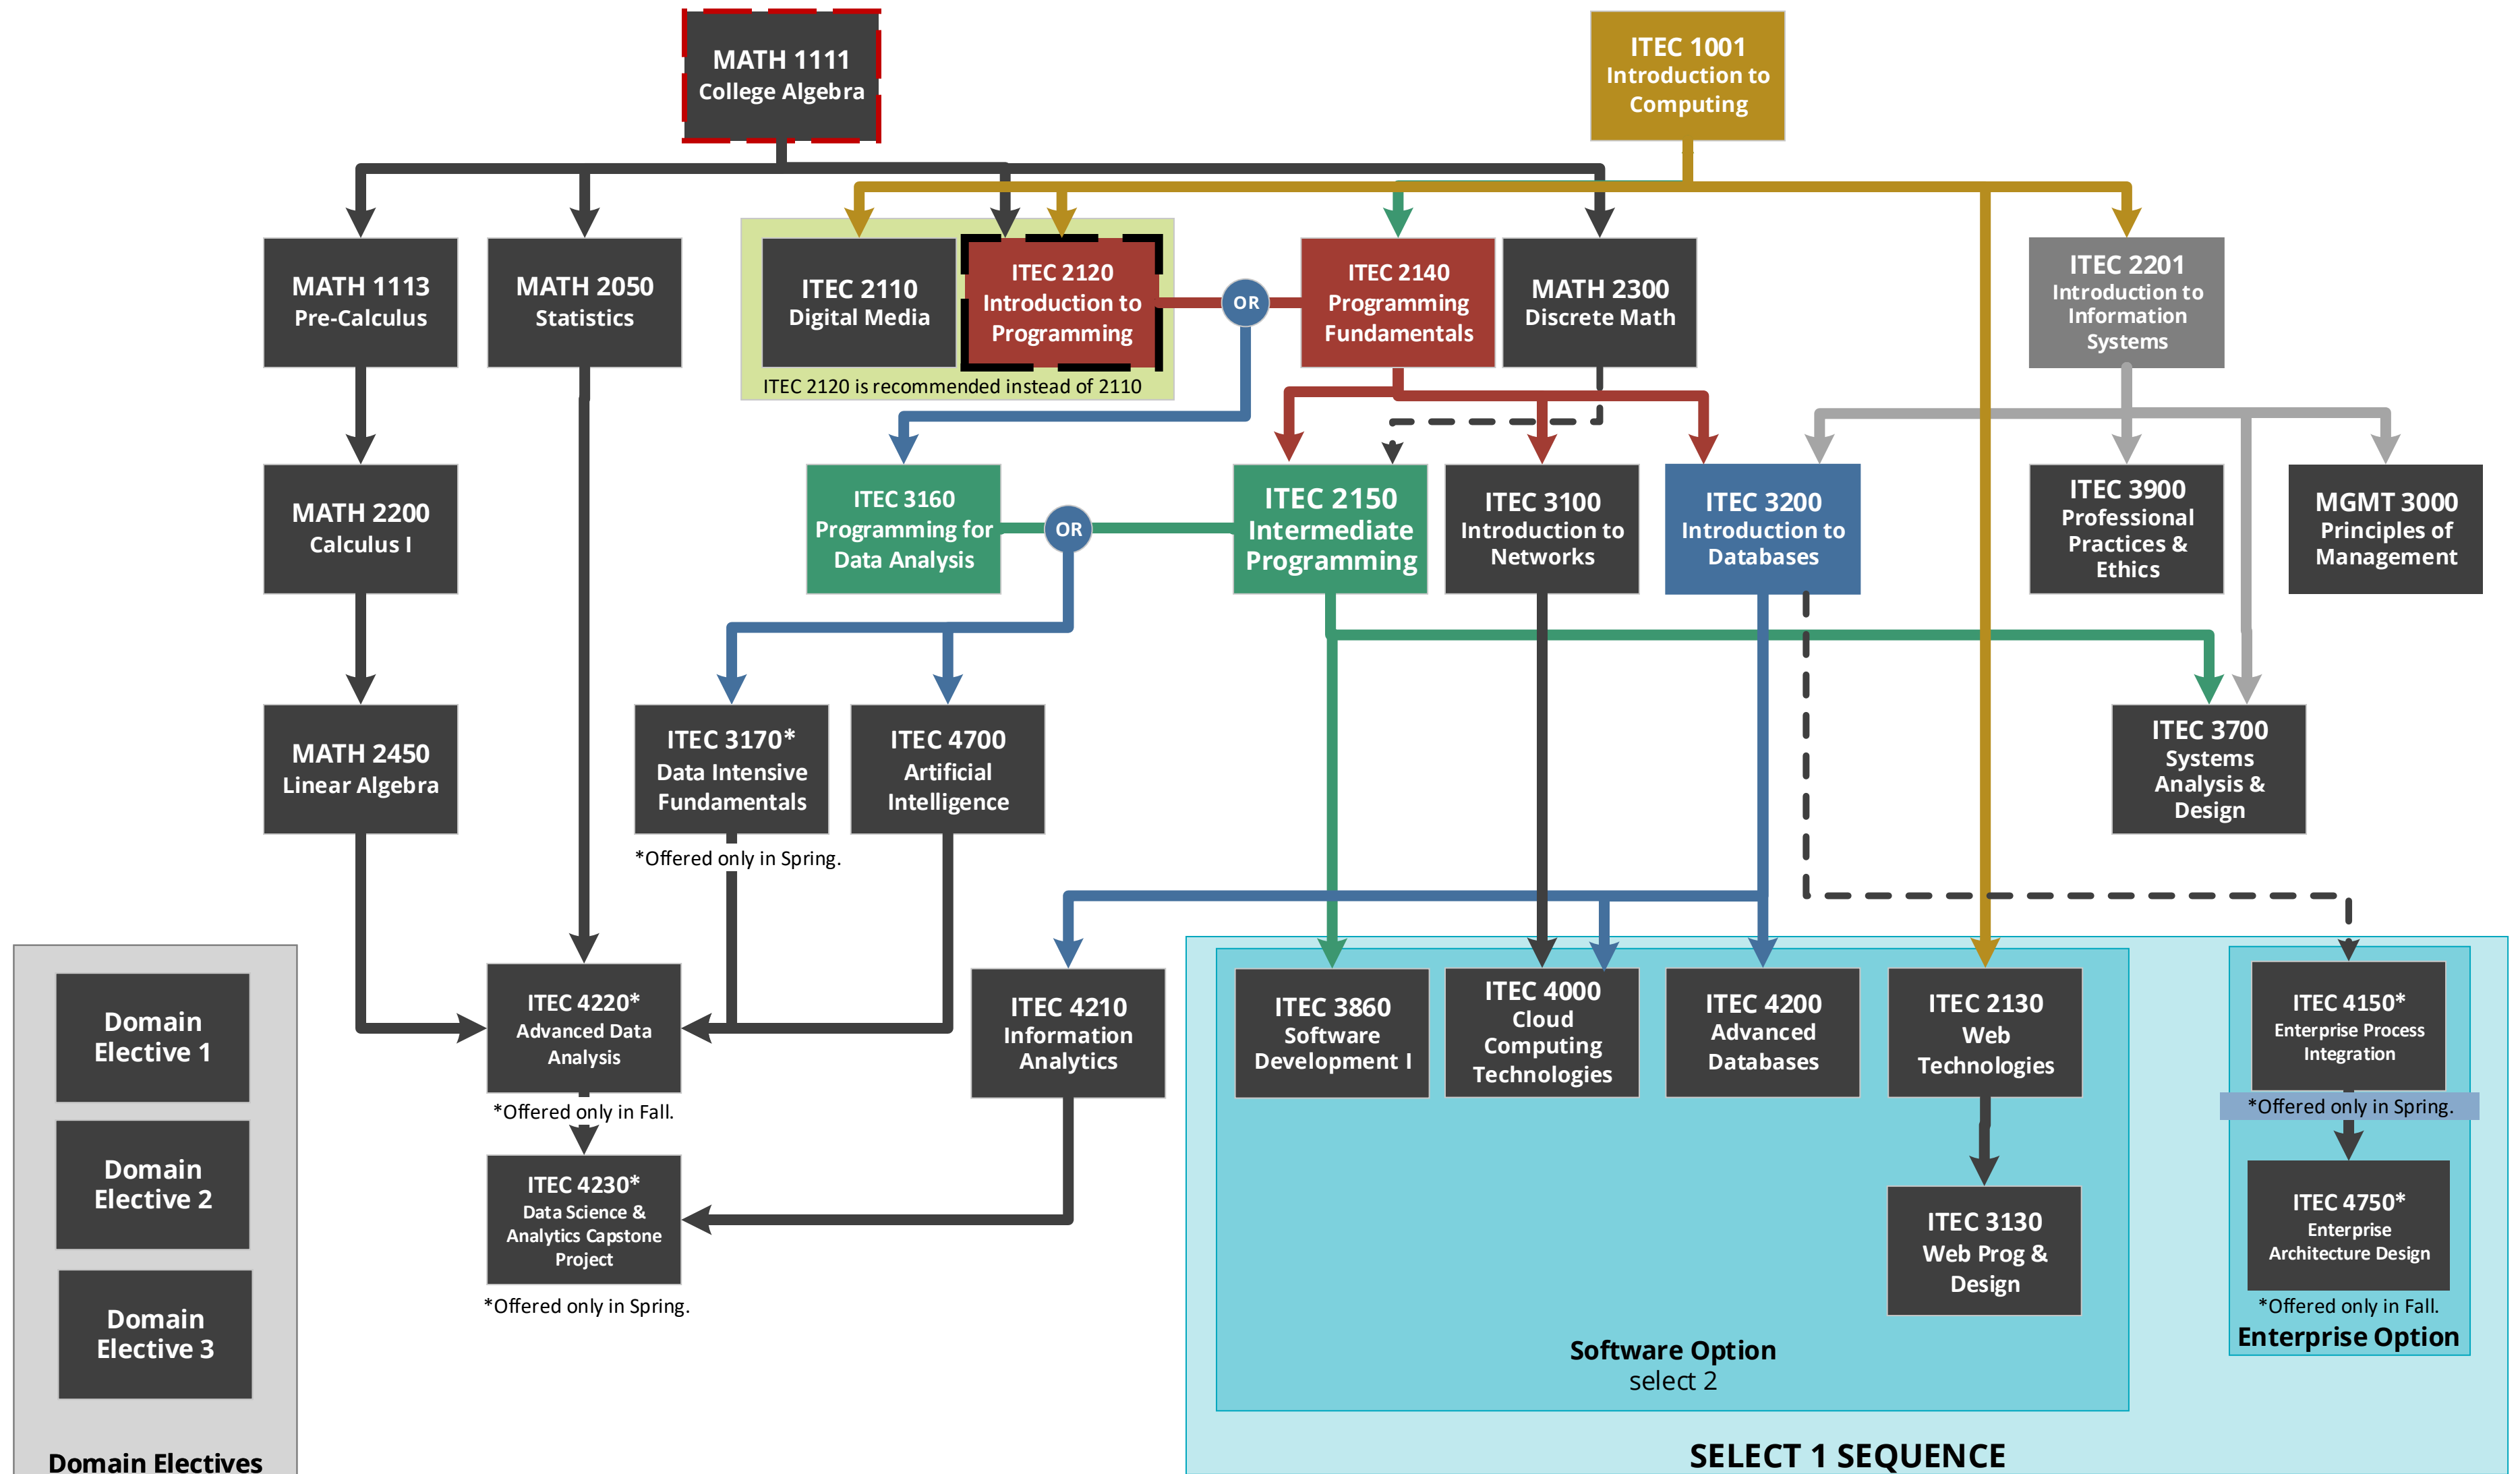

Data Science and Analytics Concentration

Academic Year 2024-25 Draft

LEGEND

Dashed arrow lines indicate instances where the course can be taken concurrently with the connected prerequisite. The OR circles does not mean a course is optional, but that either course can satisfy a prerequisite. Courses with dashed box frames (MATH 1111 and ITEC 2120) are not part of the program, but may need to be taken as prerequisite. ITEC 2120 is recommended to be substituted instead of ITEC 2110. Courses marked with an asterisk (*) are only offered once a year. Variations in box and arrow color exist to aid with clarity.

This course map exists to clarify the major and concentration course requirements. The courses and prerequisites as listed on the GGC catalog is the definitive listing, please refer to it before finalizing your schedule.
